AGGIES WIN DECISION

Aggies Win a Decided Victory Over the U. of U. Debaters Last Saturday Night in a Most Interesting Debate.

Last Saturday night the Aggie debating team won a two to one decision over the U. of U. team in one of the most interesting debates ever heard in an inter-collegiate league in Utah. From the opening speech to the closing rebuttal there was not an uninteresting moment, not a moment when the audience was not held absorbed. A most enthusiastic crowd attended the debate, composed of both students and townspeople, and filling the large assembly hall completely.

The question debated was: Resolved, that the Federal Government should establish a graduated income tax constitutionality conceded.

The U. of U. upholding the affirmative of the question, was represented by Mr. Fife, Mr. Gardner and Mr. Stokes, while the A. C., upholding the negative, was represented by Mr. Welch, Mr. Comish and Mr. Wooley.

Attorney Crockett was chairman of the debate and after reading the question to be debated and reading the instructions to the judges he introduced Mr. Fife as first speaker for the affirmative.

Mr. Fife, in a most clear discussion, defined the question, stated the clash of opinion and then gave the propositions upon which the affirmative would base their case—First, that the present Federal system of taxation was unsound and unjust; Second, that the income tax was a just tax and, Third, that the income tax was a practicable tax and could be put into successful operation. Mr. Fife then went on to show that the present tariff was essentially bad and that a different sort of tax was needed.

Mr. Welch was the first speaker for the negative. He accepted in part the definition of the

DR. WIDTSOE'S BOOK ON DRY FARMING

The recent publication of President Widtsøe's book on dry farming has filled a long-felt want on the part of agricultural investigators in the Arid West for a comprehensive treatise on this subject. The book will also be equally welcomed by the actual farmers.

According to Dr. Widtsøe, over fifty per cent. of the earth's surface receives an annual rainfall of less than 20 inches and must therefore be reclaimed, if reclaimed at all, by the methods advocated by Dr. Widtsøe in his book.

The great importance of the problems discussed by the book and its timely appearance are thus manifest. Dry farming is defined as farming under an annual rainfall of 20 inches or less. Successful dry farming is possible where the annual rainfall varies from 10 to 20 inches. The various factors which go to make successful dry farming, such as the nature of the soil, summer fallowing, depth of plowing, time of plowing and planting, etc., are thoroughly and ably discussed.

According to Dr. Widtsøe, the fundamental problems underlying dry farming are the storage

of small amounts of irrigation water in the soil and its retention until such time as it is needed by the growing plant. This may be accomplished through the methods of soil cultivation. If the soil is properly prepared to receive the precipitation which falls upon it, it may thus penetrate to great depths in the soil and then by proper methods of cultivation this water may be retained in the soil by forming a thick mulch of earth on the surface, which prevents the evaporation of the water until the time when the water is demanded by the plant. The theoretical basis of dry farming is thus presented in simple, yet logical manner.

Various other important questions related to dry farming are also thoroughly discussed, such as the kind of crops to be grown upon dry farming land, the nature and chemical composition of dry farming soils, the methods of maintaining the soil fertility of dry farming areas. The importance of the soil fertility is thoroughly discussed. The importance of summer fallowing in the Great Basin section of the country is emphasized.

(Continued on Page Eight.)

SPRING ATHLETICS

BASE BALL BEGINS

With Most of the Old Men Back and Many New Ones to Pick From—Prospects Are Good.

The baseball season has again come round and it is certainly very welcome, judging from the number of men who have made known their intention to participate in the game this year. We have a number of men who come with good reputations, and these in connection with our last season's baseball "A" men make an efficient bunch to pick from. Out of last year's team there are eight of the nine men back. These eight are Forsey, Maughan, Egbert, Crookston, Woodland, Lawrence, Christensen, and Gill. We look to Forsey and Christensen to do most of the pitching, and it is expected that most of the others will land their old positions. Good weather has set in, and from now on the prospective men can be found out doors doing diligent work. The athletic editor, together with other members of the staff, wishes all the men success.

TRACK SEASON

Prospects Are Bright in This Activity Also.

Besides baseball comes track work in the spring and here all the fellows find a chance to show whether they can go back to the farm and run fast enough to chase down the chickens in the yard or the horses on the range.

Many start in believing this can be accomplished, and think that inside of one month they can run the 100 yard dash in 10 flat, or the mile in 4:48. And just because at the end of the month they can't do quite this good, they feel discouraged, and become "quitters." However, there are some who are worse than the quitters, namely those who go out only for two or three nights or probably a week. This bunch decides that it's more fun to "queen" or to loaf on the lawns, and hence give up all

track work. This class should be called the "babies" or better still the "boobies." It indicates no sand, and no girl should talk to such a fellow. We want fellows at the A. C. who have some sand and ginger, and who know that one gets out of any thing just what he puts in to it. This is true in every case. So fellows, get gusy and try, and you'll feel better and do better.

Of course, one cannot become a track man in just a few nights, or in even a month or two, it takes long, persistent training. But if one will train one or two seasons, there is no reason at all why he cannot become a 10 second or a 4:48 man.

We have men in the school who have passed through the developing stage, and this is just what they will tell you. Work and you'll accomplish. Shirk and you'll die off. The men who have made the best records any place, always had to work. A large number of last year's track men are back and we look to a good team this year. Among those who are back may be mentioned Wyatt, Plant, Peterson, Steed, Cooley, Hancock, Aldous, Frorer and Paddock.

PROF. DREW HONORED

Prof. Drew has recently been elected a member of the American Society of Agricultural Engineers. This society will hold its next regular meeting at the University of Minnesota in December.

SKJOLDBERG.

The Danish author, J. Skjoldborg, who visited the College, and spoke in chapel a week ago last Wednesday, might with equal propriety be called a social reformer. He is the author of eight or nine powerful sociological novels, written in the naturalistic style popularized by Maupassant and Zola. These works deal chiefly with the conditions of the laboring classes in Denmark, and their influence was so pronounced that the government appointed a commission to investigate and if possible, improve conditions for the laborers on the big landed estates. Mr. Skjoldborg has been one of the

leaders in the movement which has resulted in popular high schools, farmers', mechanics', and trade schools throughout his native land.

THEME CONTEST

In a recent theme contest held by the English Four students in section three the following was awarded first place. Student Life prints this theme in order to show the excellent work done by our High school students and to encourage work along this line.

IN HONOR OF SMART.

Rah! Rah! Rah!

Rah! Rah! Rah!

Rah! Rah! Rah!

Smart! Smart! Smart!

He is an A. C. man that's certain. For would any one, other than an A. C. man make such a gift? He knew when to give it—when we needed it most. That ten thousand dollars was the nucleus—the beginning—the life of our gymnasium to be.

We had no satisfactory way of showing our gratification. We could not half express our thanks in words or actions. It would not have been sufficient for one student to have represented the whole student body in a speech to Mr. Smart. We believed that "In unity there is strength," so we all did it together. We struggled through our first four classes. At one o'clock sharp the students had gathered in a crowd in front of the new Federal building. It was an ideal day and must have been an interesting sight, for the opposite street was crowded with spectators. The band boys, in their uniform, assembled on the steps of the building and increased enthusiasm with two rousing selections. We were anxious to be moving, so the parade was immediately formed. Our beautiful banner of blue and white was carried by the first man. Mr. Stevens, the Student Body president, came next. Then came the band boys, marching by twos and playing as they went. The cadets were next in order; then came the Student Body, bearing banners of various clubs and societies. The procession proceeded to

Timpanogos

O Mighty Mountain, how I love thee as I gaze upon thy crest
Where the oak-leaf tints and maple deck thee out in gala dress.
In thy beauty thou art lovely, in thy grandeur so sublime
Sages say thou art the same as when thou wert first touched by time.

Jeweled are thy brows, O Mountain, and thine eyes doth send forth light

When the setting sun doth kiss thee, ere it yields unto the night.
All thy streams of living waters glisten, Mountain, as they run,
For thy whitened caps have courted the embrace of mid day sun.
All thy breast is decked with colors, borrowed from the solar rays,
On thy face is marked the changes of the cycles, years and days.
Proud old Mountain how I love thee, hoary as thou art and old,
With thy silver veins and crystal and thy heart of purest gold.
Iron sinews, onyx-covered, show thy strength which age hath wrought.

And thy massive granite fingers that from heaven Jove hath brought.

Boundless is thy treasure, Mountain, Monarch of each lowly vale,
Giant-like with all thy power, zephyr kissed and torn by gale.
Nature's artist (yellow Autumn) decks thee with a lavish hand—
There a green-rimmed spot of amber; here red bars fresh from her hand.

Autumn borrowed from the rainbow brighter tints than oft are seen

And she spreads them o'er thy bosom from the early morn till e'en.

Timpanogos in thy beauty, in thy grandeur so sublime,
Thou art a rugged Monarch and the peer of Father Time.

CONTRIBUTED.

the home of Mr. Smart, and a carriage was on hand to convey him to the Tabernacle. As he came out of his house he was greeted with fitting songs and noisy cheers. "Here's to Smart." "Nine rahs for the gym." "What's the matter with Smart?" After being helped into the carriage the procession followed it to the Tabernacle. At 2 o'clock all business houses were closed in honor of the occasion and crowds of towns-people joined the students at the meeting. Mr. Stevens acted as chairman. College songs were sung, speeches were made by prominent men as President Widtsee, Thomas Smart, the Mayor of Logan, and many others, which were enjoyed to the fullest extent by those present. After the singing of A. C. U. our A. C. U., the meeting was adjourned.

COLLEGE WIDOW AT
OREGON A. C.

The Feronian and Philadelphia literary societies of the Ore-

gon Agricultural College are going to present the "College Widow" in the near future. This play was the unanimous choice of both societies over a great number of worthy productions. It had that breezy college atmosphere coupled with good literary style so was accepted. The Utah A. C. certainly puts her stamp of approval on the choice of O. A. C.

AGGIES WIN DECISION.

(Continued from Page One)
question as given by the affirmative, but called the attention of the judges to two grave omissions made in this definition: First, the affirmative had not mentioned the fact that a graduated income tax was called for by the question, but had considered only a simple income tax and second they had assumed exemptions under the tax proposed while the question makes no mention of exemptions.

Throughout the debate the negative held the affirmative to these two points, points which they were apparently not prepared to discuss. Mr. Welch then outlined the case for the negative. They maintained first, that the present system, although possessing some evils, could be remedied much easier and with greater safety than the income tax could be introduced; Second, that the income tax was essentially unjust and, Third, that it was impracticable. It will be seen that a complete clash of opinion took place between the two sides. Mr. Welch then discussed the first proposition for the negative.

Mr. Gardner followed Mr. Welch, speaking second for the University, and Mr. Comish for the U. A. C., followed him. The case for the U. of U. was closed by Mr. Stokes, while Mr. Wooley made the closing speech for the Aggies. The rebuttals then followed in the same order that the main speeches were delivered, except that the U. A. C. spoke first in rebuttal and the U. of U. last. Each man had a rebuttal speech to make.

All through the debate intense enthusiasm was shown. Each man was welcomed with applause and cheering and retired in the midst of it. When the last rebuttal speech was finished the excitement was extreme. The decisions of the judges was awaited most impatiently. When Chairman Crockett finally read, "Two for the negative" the house went wild. The victorious team was raised high upon the shoulders of the happy students and carried at the head of a cheering procession out of the chapel and through the halls of the building until throats were too hoarse to cheer longer.

That the decision was well earned

ed there can be no doubt. The A. C. debaters excelled at every stage. Their material was more logically arranged and better delivered. Their English was much superior and their stage presence more pleasing.

After the debate the debaters for both schools were entertained at Miss Inez Maughan's, where a most pleasant time was had.

The judges for the debate were: Attorney Thurman of Salt Lake City, Attorney Bowen of Logan, and Mr. Childs, superintendent of the Salt Lake City schools.

ENJOYABLE AFFAIR.

Last Friday night the Women of the A. C. gave a party for its members and their escorts, in the Woman's Building. The party was a dancing party with games in the south gymnasium for those who did not care to dance. Punch and wafers were served from one corner of the rest room on the fourth floor. Every one seemed to have a very enjoyable time. For all that the storm came down in torrents a large number were present, among the number were the following:

Mrs. Widsote, Mrs. Ball, Miss Huntington, Mrs. Bingham, Miss Dudley, Mrs. Peterson, Mrs. Stephens, Miss Kyle, Mrs. Jensen, Mrs. Caine, Miss Crookston, Mrs. Walker, Miss Cooper, Miss Hattie Smith, Mrs. Titus, Mrs. Armstrong, Mrs. Day, Miss Maughan, Mrs. Stewart, Dr. Ball, Dr. Widsote, Mr. Fletcher, Mr. Powell, Mr. Bingham, Mr. Cook, Mr. Arnold, Mr. Hendricks, Mr. Jensen, J. T. Caine, Jr., J. T. Caine, III, Dr. Stewart, Mr. K. Peterson and Mr. Stephens.

LANGTON HONORED AT COLUMBIA.

Last week during the absence of Prof. Arnold, instructor of higher mathematics at Columbia University, Professor Langton was given the honor of conducting his classes. When we consider the standing of Columbia as a University, this is indeed worthy of note. Prof. Langton is working for his Ph. D. at Columbia.

IT IS TO LAUGH.

The Aggies won the debate last Saturday night and therefore can afford to be lenient. Adverse reports of the debate that seem to have arisen from one knows where call forth laughter rather than tears. Certain it is that some reports that reached the Salt Lake dailies are of the laughter provoking sort. In a write-up of the debate appearing in the Sunday Herald-Republican, the statement is made that the A. C. debaters won merely a popular decision and that they continually hung upon the constitutional aspect of the question. Yet, a few lines above in the statement of the question the words "constitutionality conceded" were plainly visible. You would scarcely expect three sane judges to award the decision to a side that spent their time discussing conceded matter. And surely an opposing team would be asleep not to notice the fact. The Republican write-up is not liable to spread very widely their wrong opinion, however, because of the close scrutiny of the paper required to locate the write-up at all.

The following extended notice appeared in the Evening Telegram:

Doings at the "U."

The "U" debating team lost to the agricultural college Saturday night in one of the best contests of the season. It was a split decision, but the judges admitted that the "U" had a more logical case. The A. C. team had their speeches memorized

and all that won for them was the cheering of the students.

Note the small "a" and "e" when the Agricultural College is named. Note the inference when it is stated that, although the judges admitted that the "U" had a stronger case yet they allowed the enthusiasm of the students to so carry them away that they submitted a decision based merely upon popular feeling and not upon argument, directly contrary to the directions read to them before the contest.

Nothing could be more fair than the write-up accorded the debate by the "Chronicle," however. While we may not agree in every particular with their write-up, yet college loyalty must necessarily make their viewpoint different from ours.

CONGRATULATION STUDENTS

Debating is coming into its own. Its position at the A. C. is becoming what it should be. The spirit shown at the debate last Saturday night surpassed in genuineness anything ever seen before at the A. C. upon such an occasion. In the first place the students were out en-masse. In the second place they showed an intense interest throughout the debate. In the third place they accorded to their victorious team what was due them.

Now that debating is so loyally supported we may confidently look forward to great successes in this line of school activity.

\$40,000 POWER PLANT ASSURED.

It took just forty five minutes for the Robinson power plant bill to pass both the House and the Senate. The passage of this bill will assure for the Agricultural College and several other state institutions sufficient electricity for their use.

It was certainly a very wise move of the legislature to pass such a bill as the power supply for state institutions costs the state thousands of dollars a year and the establishment of this plant will save this expense.

The power plant will be located just at the mouth of Logan canyon

Social Calendar

DEBATERS ENTERTAINED

Last Saturday at one o'clock the debaters representing both the U. of U. and the U. A. C., were entertained at a most delightful lunch at the Woman's Building.

The Kappa Nu girls of the B. Y. C. are now serving a cafeteria lunch. Go down and test their cooking. It's fine.

Carmichael entered the Richmond Coop to get tickets for his new girl "Richmond sure has some swell girls, I think I'll come here often—"

Clark—We are glad to have you for we have more girls than we need.

Mike—Oh! but I know you need this one. She's a peach.

Clark—Well our fellows have all had their pick.

Departments

VETERINARY SCIENCE.

The department of Veterinary Science, though not a large one, in our school, is an important one. Dr. H. J. Frederick is at the head of this work and is making the department a success.

Five courses are offered, one of which is required of all students in agriculture.

The good work that is being done in the Veterinary department here is attested by the fact that full credit is given for the work taken here by the eastern schools.

Of Dr. Frederick's former students about twenty are now in the East doing advanced work. Most of these are in Ohio and Pennsylvania, and about fourteen of the number will graduate this year.

One of the most important features of this work is the free clinic that is held every week. In these clinics the students get practical experience in dealing with the various diseases of domestic animals. Not only is this very beneficial to the students but it is very much so to the farmers of this city and of the surrounding towns. The clinics are very well attended, there being as high as fifty cases handled in one day.

This work is also doing very much in the way of advertising the College and its work.

The Veterinary Hospital is fairly well equipped, and the students do a great amount of practical work, both with the live animals and in post-mortem work.

The lecture room on the first floor of the main building is well equipped with specimens, skeletons, charts, etc. In all about one hundred students are registered in this work, which is certainly of great importance to Agriculture students.

BACTERIOLOGY.

Besides the work in Veterinary Science, Dr. Frederick has charge of the department of Bacteriology. This department has a good laboratory and lecture room in the south end of the first floor of the main building. At present only one course is given in Bacteriology. More work ought to be given, but Dr. Frederick's time is already so fully occupied that it is not possible to do so. This one course is required in

the General Science, Domestic Science and Agriculture courses. In this course a general knowledge of bacteria, their growth and methods of studying them is aimed at. The different kinds of culture media are prepared by the student and pure cultures of various common germs are made and studied. Bacterial determinations are made of soil, water and milk, acquainting the students with the kinds of bacteria found in such sources and the methods of making such a count. On the whole a course in Bacteriology is one of the important parts of a well rounded educational training.

ONE NIGHT FOR "COLLEGE WIDOW."

Contrary to previous arrangements which were announced in last week's Student Life, the "College Widow" will be presented but one night in Logan at present. A performance will take place to-night for the students after which the trip south will be taken. After returning from this trip the play will be presented at the Thatcher opera house again for the benefit of Logan playgoers.

The play was presented last Monday night at Richmond where a good sized audience greeted it. The performance went along very smoothly and showed excellent work.

Alumni Notes

Lieutenant Eugene Santschi, '08

Miss Ethel Lee, '09, of Hoytsville, has been visiting the College for a few days. She attended the Military ball where she met a number of class-mates and former school-mates.

Lieutenant Santschi, '08, and Mrs. Santschi, '02, have removed from Fort Douglas to Denver, where they will remain until May, when they leave for the Philippine Islands. Lieutenant Santschi's regiment has been detailed for service in the Islands.

Hugh Adams, '09, and Mrs. Adams, of Mendon, were in attendance at the Military Ball.

Vincent Cardon, '09, surprised his many friends by appearing at

the Ball. Few people knew he had returned from Washington. He remained here a few days and then proceeded to his post at the Nephi Experimental farm to begin the season's work.

Earl Bennion, '09, and Mrs. Bennion, '09, have returned to their home near Murray (R. F. D. No. 7), after a pleasant sojourn of eight weeks in Logan. During this period Mr. Bennion was in charge of the work in Animal Husbandry at the College.

Elmer Barrett, '10, has been conducting Professor J. W. Jensen's classes during the last week or two. Mr. Barrett re-

ports terrific floods in the northern part of Box Elder county near the Idaho line. A newly built earthen dam and other construction work of which he was in charge was endangered by the rushing waters, and Mr. Barrett with his force of men kept steadily at work for 76 hours, and succeeded in saving the dam.

Alfred A. Hart, '97, of Bloomington, Idaho, was honored by his fellow citizens in the last election by being made county Superintendent of Public Instruction in Bear Lake county, Idaho, to succeed his sister, Miss Hermoine Hart, '97, now Mrs. Roberts, who ably filled the position for a number of years. Mr. Hart, a brother of Judge Hart of Logan, has resided in Bloomington ever since graduating. He owns a farm there, and has

Undoubtedly his long experience in the school work will enable him to execute his new duties with ease and efficiency.

Alexander Ray Irvine, '98,

(Continued on Page Eight.)

THERE is a right way and a wrong way to do everything. The right way to keep an account of your school expenses is to open an account with us. Here you get the practical side of life as well as the theoretical. Ladies as well as gentlemen will be cordially welcome.

"MEN WHO KNOW" USE THE DE LAVAL Cream Separator

Does it not mean a great deal to YOU, the prospective buyer of a cream separator, that such men as Gov. W.D. Hoard, publisher of Hoard's Dairyman, Henry C. Wallace, publisher of Wallace's Farmer... E. R. Shoemaker, editor of Kimball's Dairy Farmer, Victor Lawson, publisher of the Chicago Daily News, T. T. Bacher, publisher of Northwest'n Dairyman, L.E. Holden, publisher of the Cleveland Plain Dealer, W. A. Shaw, publisher of the Texas Farmer, H. G. McMillan, publisher of the Farmer's Tribune, Geo. Booth, publisher of the Detroit News, Geo. Brumber, pres't of the Germania Publishing Co. and many others like them, good dairy farmers as well as leading editors and publishers, each of whom is possessed of much personal experience and a thousand authoritative sources of separator information, are among the 1, 250,000 satisfied users of DELAVAL Cream Separators?

Locals

Merl Taylor makes an excellent girl.

Mr. Orville L. Lee, '10, was a visitor here Wednesday.

Rev. Whittenberger of the Logan Presbyterian church spoke in chapel Saturday.

Track work has begun in earnest. Prospects for this year are bright as ever.

The best laugh the people in Richmond had last Monday night was when Harry Beers allowed the curtain to go down with him on the outside.

Claire went to Richmond without her shoes. Prof. Larsen very kindly took them to her on the next train, but it was too late. Claire has had a bad cold ever since.

Miss Gertrude Vibrans, of Cokeville, Wyo., who for several years was instructor in sewing in the college, spent last week in Logan as the guest of Mrs. Cook.

The fellows of the Pi Zeta Pi fraternity held a stag party at their house last Friday night. An elaborate banquet with toasts and music was the principle feature of the evening's entertainment. Vince Cardon happened in town that day and joined in the celebration.

The program for the Academy of Science which meets in S. L. C. on April 7 and 8 is just out and is as follows. Presidential address on "Engines" Dr. Ball. Lecture on "The Planetismal Hypothesis" Prof. Wm. Peterson. Nitrogen Investigation, Dr. Stewart. Effect of alkalies on apple leaves. Prof. E. P. Hoff. Breeding for Egg production Prof. Turpin.

"The College Widow" Tonight.

Miss Ethel Lee, '09, was a college visitor last week.

Mrs. Susie Y. Gates spent several days on College Hill during the past week.

The Women of the U. A. C. entertained last Friday night, at the Woman's building.

Professor's Merrill, Ball, Caine III and Miss Dudley left Wednesday for Huntsville to hold an institute on Thursday and Friday.

The military department is rejoicing over the good weather as it gives them a chance to leave their coop and get out on the campus and enjoy nature.

Miss Barbara Howell, who was at the A. C. the first part of the year, has returned from Washington, D. C., where she has spent the last three months.

When the two fellows were ready to take the twins home from the dance, they stood amazed and full of wonder, then one went up and asked "did I bring you or was it the other one?" Estella with a smile, "I'll be blessed if I know, go ask Luella."

A week from to-day the A. C. Woman's club will give a card party in the Boosters rooms. In the afternoon and evening tables will be sold for one dollar each or twenty-five cents a chair. Light refreshments will be served and there will be some music. The entertainment is given to secure funds with which to purchase one of Mr. Moser's paintings for our library, and students wishing to entertain their friends in that way might get three or four tables and play progressive games, and incidentally aid in the good cause.

ORATORICAL CONTEST

Student Life announced several weeks ago an oratorical contest to be held this year, the winner to receive the "Hendricks Medal." A definite date has now been set for this contest. It will take place the evening of April 15 at the A. C. chapel. All wishing to enter this contest should see Prof. Larsen at once.

Pres. Widtsoe is in S. L. C. again on business.

Don't fail to see the greatest college play ever written. To night is student's night.

Last Thursday the "A" men of the track team met and elected Abe Cooley captain for this year.

Our present board of Trustees have all been reappointed with the following persons in addition Jas. M. Peterson of Richfield; J. A. Hyde of Nephi; Angue T. Wright of Ogden; and Secretary of State C. S. Tingey.

DR. WIDTSOE'S BOOK ON DRY FARMING.

Continued from page one

asized by the author. Attention is called to the work of other investigators in the Great Plains area of the country, where systems of crop rotation are advocated, but Dr. Widsøe emphasizes the importance of the clean summer fallow if success is desired in the dry farming sections of the Great Basin and similar countries where the greater portion of the annual rainfall is received by the soil during the winter months. The characteristic difference of the methods followed in the Great Plains area of the country and in the Great Basin is probably due to the difference in the annual precipitation. In the Great Plain area of the country the greater portion of the rainfall is received during the growing period of the crop, while in the Great Basin area the greater portion of the rainfall is received during the dormant stage of the crop, or during the winter season. This necessitates the practicing of the system of summer fallowing as advocated by the author.

Attention is also called to the fact that crops grown under a system of dry farming have a greater intrinsic value. This is due to the lower moisture content and the higher protein content. Thus, wheat grown under a system of dry farming is of greater value for the purpose of producing flour than the same variety grown under humid conditions, owing to the fact that it has a lower moisture content and a higher gluten content.

The original investigations of Dr. Widsøe and his associates at the Utah Agricultural Experiment Station have contributed largely to the material found in the book. It is probably not too much to say that were it not for Dr. Widsøe's own investigations, the book could not have been

written. The matter is presented in the simple, lucid, scientific manner characteristic of the author. The book is permeated with the enthusiasm of the writer for his subject and every chapter denotes his great faith in the ultimate of the vast areas of land formerly known as the Great American Desert. Besides serving its intended purpose, the many investigators in arid agriculture will receive similar inspiration from the book that all of Dr. Widsøe's students have received in coming in contact with the man. Let us hope that this is only the first book to be issued by Dr. Widsøe in behalf of arid agriculture. The investigators and the farmers of the West are crying for a similar book on irrigation farming and Dr. Widsøe is the man to write it. It is to be hoped that Dr. Widsøe will be able to find time from his many duties to write such a book, which will no doubt be as favorably received as is this book on dry farming. The book on dry farming is published by the Macmillan Co., of New York, as one of the Rural Science Series, which is edited by L. H. Bailey, Director of the Experiment Station of Cornell University.

DR. R. STEWART.

ALUMNI NOTES.

(Continued From Page Six)
(M. D. 1906, Medico-Chirurgical College, Philadelphia) recently returned to his home and his extensive practice in Salt Lake City, after a six months absence in Vienna. While abroad Dr. Irvine devoted his time to special medical studies, and to hospital work.

Now that the warm beautiful days are here, don't let that lazy wondering spirit take possession of you. Stay with school and your books. Remember it is the fellow who has sand enough to do this that succeeds.
